

FIG. 2 is a cross-sectional view of a device in accordance with the present invention, showing a probe 3 inserted into a channel 4 of a substrate 1. The probe 3 is shown in cross-section, with a central core 3 and an outer sheath 3. The channel 4 is formed in the substrate 1, and the probe 3 is inserted into the channel 4. The substrate 1 is shown in cross-section, with a central core 1 and an outer sheath 1. The channel 4 is formed in the substrate 1, and the probe 3 is inserted into the channel 4. The probe 3 is shown in cross-section, with a central core 3 and an outer sheath 3. The channel 4 is formed in the substrate 1, and the probe 3 is inserted into the channel 4.
